Attention: Mr. Bruce McLennan, Chair

Re: Notification to YUB Re: Secondary Sales Suspension – Effective September 1, 2010

Yukon Energy is writing to inform the Yukon Utilities Board that due to reservoir levels and water flow conditions, surplus hydro sales under Rate Schedules 43 and 32¹ will not be available to customers on the WAF and Mayo Dawson systems starting September 1, 2010 and continuing for at least the coming winter.

Yukon Energy will be working with Yukon Electrical Company Limited during August 2010 to provide secondary energy customers with notice of the suspension of Rate Schedule 32 Secondary Energy so that they have adequate time to ensure their alternative heating systems are in good working order starting September 1, 2010 and for winter 2010/11. Notices to be provided to Yukon Electrical Company Limited for their WAF secondary energy customers and Yukon Energy's secondary energy customers on the Mayo-Dawson system are provided for the Board's information.

Sincerely,

Hector Campbell, P.Eng, MBA.
Director, Resource Planning & Regulatory Affairs

c: Yukon Electrical Company Limited

¹ Rate Schedule 32 - Secondary Energy is made available to customers on the WAF and Mayo-Dawson systems on an interruptible basis, subject to the system conditions meeting the tests set out in the rate schedule. In particular the supply of the energy under this rate schedule is subject to determination by Yukon Energy of the availability of surplus hydro.
